

COLOR VIEWING LIGHT BASIC

The viewing booths "BASIC" provide a reliable color assessment between three, four or five illuminants. The illuminants are switched on/off by a switch and the lamp's operating life is monitored by a digital hour meter. The compact design of the BASIC Color Viewing Light makes it suitable for small to medium-sized samples, irrespective of the material or intended purpose.

Cost-effective entry-level class
A choice of 3, 4 or 5 illuminants
Digital hour meter for D65
Compact design

COLOR VIEWING LIGHT ADVANCED & PROFESSIONAL

The ADVANCED and PROFESSIONAL Color Viewing Light models offer practical matching for a range of surfaces and materials. The viewing booths have five different illuminants and are available in five different sizes, enabling diverse application areas to be covered.

Color Viewing Light ADVANCED
In the ADVANCED version a sequential order of illuminants can be saved for a recurring matching process. It can also provide mixed light when several light sources are triggered at the same time.

5 illuminants*: D65, D50, TL84, A, UV
User-friendly Electronic Control Panel
Digital hour meter for all illuminants
Mixed light function
Storage for 1 light sequence
